FORD'S SEED LIST

W. F. FORD & CO.

IMPORTERS
AND EXPORTERS
OF HIGH-GRADE SEED

SEEDSMEN
JOHANNESBURG.

SEED CONTRACTORS TO
THE UNION GOVERNMENT

TO OUR FRIENDS:

29/31 GOCH STREET,
NEWTOWN.
JOHANNESBURG.

Telegrams:
"AFFORD."

Telephone:
33-3526.

Bankers:—BARCLAYS.

We take pleasure in presenting to you the New Edition of Ford's Seed List—our Catalogue—and we wish to thank you at this time for your orders during the past year.

Such liberal patronage must be deserved, and we want to assure you that at all times we are most cautious to ensure the highest quality of Ford's Seeds. As in the past, your orders shall always have our most careful attention. Your requests for prompt delivery of any items required urgently shall be taken care of immediately.

We shall appreciate your valued orders, whether large or small, with the assurance that you will receive Quality Seeds and Quick Service.

Faithfully yours,

A. FORD & CO.

General Manager: E. A. HOPSON, F.R.H.S.

Secretary: ALAN E. HOPSON.

Suppliers of Seed to:—

The Union Agricultural Colleges.

The Government of the Union of South Africa under contract.

The Rhodesian Governments.

The Portuguese East African Government.

The South West African Government.

The Kenya Colony Government.

The Swaziland Government.

The Basutoland Government.

The Indian Government.

The Argentine Republic.

The Johannesburg and other Municipalities, Land Corporations, etc.

Exporters of Seed to:—

Australia; United States of America; South America; France; India; Burma;

The Belgian Congo; Uganda; Portuguese East Africa; Nyasaland; Kenya;

Bechuanaland, etc., etc.

NON-WARRANTY—We take the utmost care to supply Seeds, etc., true to name and character, of good germinating strength, and genuine in every way, but owing to changeable climate influences, different modes of cultivation, and various causes over which we have no control. WE GIVE NO WARRANTY expressed or implied, as to description, quality, growth, productiveness, or any other matter of any of the seeds, trees, plants and bulbs we send out and will not in any way be responsible for results. If the purchaser does not accept the goods on these terms they are at once to be returned.

Quotations subject to Market fluctuations and goods being unsold on receipt of orders.

BUSINESS INFORMATION

QUOTATIONS ARE WITHOUT ENGAGEMENT, but where the price is mentioned on the order, we will refer back for confirmation if an increased rate has to be charged. If we fail to do this, the goods can be returned if the price is not approved.

When we are unable to supply the exact variety ordered, we use our best judgment as to substituting other varieties. Any such substitutions are always made with a due regard to season, locality and other conditions so far as known to us.

The substituted varieties are sent for your approval, and while we hope, and feel sure you will agree to what we have done with a desire to serve your best interest, you are at liberty to send back any such goods, and we will promptly credit you with their value.

WHEN TO ORDER: Kindly place your general order as early in the Season as possible, so that when conditions are favourable, your seed will be on hand.

METHOD OF ORDERING: Name, Postal Address, Station and District, should be clearly set forth, and full forwarding instructions given, so that mistakes cannot arise. PLEASE USE OUR ORDER FORMS, which will be found at front and back of this book. Further supplies on application.

TERMS: Prices quoted are FREE ON RAILS, JOHANNESBURG, NETT CASH, or per S.A. Railways, C.O.D., or Postal C.O.D. Cash should accompany all orders unless arrangements have been made for the opening of a monthly account, in which case our terms are strictly thirty days' cash, and all railage must be paid by the purchaser. If GOODS ARE TO BE SENT TO SIDINGS, PLEASE INCLUDE COST OF RAILAGE, as same must be prepaid. Customers must clearly understand that we undertake no responsibility for the safe delivery of goods which are consigned by rail to SIDINGS where there is no Station Master.

Five per cent. can be deducted on seeds priced in this book if cash is sent with order.

NOTE. When insufficient Cash is sent, quantities will be reduced accordingly. Any excess payments will be returned with invoice.

Amounts up to 21/- kindly send by Postal Order.

PLEASE ADD 6d. EXCHANGE TO COUNTRY CHEQUES.

GOODS BY POST: Where it is desired that goods be forwarded by post a remittance must be sent to cover postage. Our Seeds are only bought from the World's most reliable Growers and Seedsmen, and, a large proportion being necessarily Imported, cannot be sent by Agricultural Post.

SEEDS BY PARCEL POST

Rates of Postage for IMPORTED Seed are as follows:—
Union, South West Africa and Portuguese East Africa—Up to 4oz., 2d.; 8 oz.,

4d.; 1 lb., 6d. Every additional lb. or part thereof, 6d.
Rhodesia (South).—1/1 lb. or part thereof.
Rhodesia (North).—1/3 lb. or part thereof.
Bechuanaland.—1/- lb. or part thereof.

It Pays to Grow New, Clean, Reliable Seed

IMPORTED SEED CANNOT BE SENT BY AGRICULTURAL POST

Rates given hereunder for AGRICULTURAL POST apply ONLY to SOUTH AFRICAN PRODUCE sent to places WITHIN THE UNION.

Not exceeding	1½ lb.	3d.
" "	3 lb.	6d.
" "	6 lb.	8d.
" "	9 lb.	10d.
" "	11 lb.	1/-

Agricultural parcels addressed to BECHUANALAND PROTECTORATE (Excepting Kasane, Maun and Ghanzi)

SOUTH AFRICAN SEASONS.

Autumn commences	March 21
Winter commences	June 22
Spring Commences	September 24
Summer commences	December 22

HOW MUCH SEED YOU WILL REQUIRE

One pound of Broad Beans or Runners gives a row of 50 to 60 feet.

One pound of Kidney Beans gives almost double that length of row.

One ounce of Cabbage seed covers 6 to 8 square yards and the same applies to Cauliflower, Savoys, etc. From that amount you get 5,000 plants or more.

An ounce of Celery gives an enormous number of plants, say 20,000 or more.

An ounce of Leeks covers 5 square yards and yields up to 8,000 plants.

An ounce of Mustard covers 1 square yard; of Cress, 3 square yards; of Radishes, 2 to 3 square yards.

An ounce of Lettuce covers 10 to 15 square yards.

An ounce of Beetroot gives a row 50 feet long; Carrots 80 feet; Onion 150 feet;

Parsnips 200 feet; Parsley 120 feet; Radishes 75 feet; Spinach 100 feet; and Turnips 120 feet.

WHEN TO ORDER SEEDS.

FLOWERS

JULY AND AUGUST:

Order Annuals, for Summer flowers.

SEPTEMBER TO NOVEMBER:

Order ALL Perennials.

DECEMBER AND JANUARY:

Order Annuals, for Autumn flowers.

FEBRUARY AND MARCH:

Order Annuals, for Winter flowers.

APRIL:

Order Annuals, for Spring Flowers.

VEGETABLES

JULY TO OCTOBER:

Order Summer Vegetables.

JANUARY AND FEBRUARY:

Order Winter vegetables.

“FORD'S Seeds Grow”

PEAS—ERTJIES

HIDDEN HELPERS

When you are clearing away Peas and Beans, do not pull up the plants, but cut them off at the soil and leave the roots in the ground.

The roots of Peas and Beans are covered with little nodules, in which live millions of tiny bacteria all engaged in changing atmospheric nitrogen into plant foods.

Leave them there to carry on the good work. Your next crops will reap the benefit.

5 lbs. or more will be supplied at the 10 lb. rate:

25 lbs. or more will be supplied at the 100 lbs. rate:

On larger quantities, write for special prices.

Seed Sowing

In 99 per cent. of the causes of failures experienced in raising Seed for the Home Garden, there is nothing at all wrong with the germinating power of the Seed, and the non-appearance of the plants is nearly always due to one of the following causes:—

1. Sowing Seed too deeply or not covering sufficiently.
2. Allowing the surface soil to become too dry-caked.
3. Omitting to provide some sort of covering during hot weather.
4. Sowing when the soil is too cold or too wet to permit germination.

FORD'S Fertilizers Make Seeds Grow. Full Fertilizer List—See Pages 40 and 41.

LETTUCE—SLAAI

HOW TO GROW GOOD LETTUCE

Make sowings of seed about once every two or three weeks—just a pinch of seed on the rule of "little and often." In the height of summer, or with dry weather, the seedlings do not transplant very easily, and moving causes them a bad shock. Therefore, sow the seed very thinly indeed. When large enough to handle, thin out the seedlings to stand some 9 inches apart, and just leave them. This is the way to get lettuces of fine quality quickly.

In the case of tall or "cos" lettuce, particularly, you need to remember that they are very thirsty subjects, and require a great deal of water if they are to grow quickly. You must remember though, that when you use the watering can very freely, the surface of the ground becomes very hard, so that every now and then it will pay to loosen it up with the hoe. To grow really good, hearty lettuce of the cos variety, wait till it is about half developed, and then, fairly loosely, tie round a piece of bast, about two-thirds of the way up.

Ford's Boer Improved

Some Reasons for Growing Cattle Pumpkins

1. A cheap, easily-grown, Winter fodder for Cattle, Pigs and Horses.
2. Of good feeding value and high palatability.
3. A short Season Summer crop, only occupying the land for four to five months.
4. Excellent as a Rotation crop for cleaning up weedy ground.
5. The pumpkins can be stored and used as required during the Winter and Early Spring.
6. A change of Fodder and a good addition to Chaff, Hay or Ensilage.

During Sowing Season see our advertisements in the "Farmer's Weekly" for ruling prices.

A SUITABLE ROTATION FOR MAIZE

1st Year.—Cowpeas: grazed off; made into hay; or ploughed under.

2nd Year.—Maize fertilized. (Superphosphate, 300-400 lb. per morgen.)

3rd Year.—Maize: unfertilized.

4th Year.—Teff: Sudan Grass; or Manna.

WISCONSIN WHITE DENT SEED MAIZE

NEW CROP

Our seed is very well known throughout the Union, Rhodesia, Portuguese East Africa, and South West Africa. It is gathered only from specially selected cobs. The demand for this seed increases yearly.

The advantages of this variety are:—

- (1) QUICK MATURING. (Can be planted up to the 15th December on the High Veld.)
- (2) HEAVY YIELDING.
- (3) A SMALL BUT HEAVY GRAIN, full machine bag of which weighs 240 lbs.
- (4) STOCK EAT ALL THE STALKS.
- (5) DROUGHT RESISTING.

27/6 per bag 203 lbs. F.O.R. JOHANNESBURG.

LEGUMES

They gather nitrogen from the atmosphere without cost to the farmer and are often aptly referred to as "soil renovators." You cannot afford to overlook them.

WRITE FOR PRICES or see our advertisements in the "Farmer's Weekly" during Planting Season.

Farmers are rapidly awakening to the importance of growing some Legume or other. It is hardly necessary to define a Legume, but to those who are ignorant of its true definition, it might be described as a soil and animal improving crop.

A Legume, due to its capability of developing nodules containing nitrogen on its roots, improves the soil by adding that most important plant food to it. Several cases can be quoted where the inclusion of a Legume in a cropping system has resulted in a higher yield of crops following.

One of the main faults of cattle feeding in South Africa is the general scarcity of protein rich feeds. Such a deficiency could be supplied by growing a Legume. There is little doubt that in most farm practices highest profits are possible by feeding mainly home-grown feeds.

BACTERIA FOR SEED INOCULATION

Every farmer should use our Bacteria to treat all Legumes, lucerne, beans and peas. It is the cheapest and best fertilizer known. Gives better crops, increases their food value 10 to 50 per cent. and leaves some 50 to 100 lbs. of nitrogen in the soil. Used to grow humus it is the world's best fertilizer. 7/6 per tin sufficient for 60 lbs. of lucerne, Peas, Beans, Cowpeas or Vetches.

MUNG BEAN

(Phaseolus Radiatus L.)

WHY YOU SHOULD PLANT THE MUNG BEAN

1. It is erect in growth and consequently can be easily mown with ordinary mower and made into hay, or ploughed under as green manure; three difficult operations in connection with the Cow Pea because of the latter's decumbent growth.
2. It yields better than the Cow Pea.
3. It is less susceptible to disease.
4. The hay crop matures in 100 days.
5. The Bean crop matures in 135 days.
6. It is readily eaten by cattle.
7. It is very nutritious and does well as a Hay crop on dry lands.
8. It has a large yield.
9. It is simple to cultivate. Drill in rows three feet apart and about 12 lbs. seed per acre.
10. Being a legume, it increases the nitrogen content of the soil.
11. It is pre-eminently a crop to be used in maize rotation.
12. PLANTING—Lowveld, August to December.

Middleveld, October to mid. December.

Highveld, October to end November.

10 lbs. Post Paid Agricultural Post 3/6
25 lbs., 5/-: 50 lbs., 9/6: 100 lbs., 18/6
200 lbs. 35/-.

Summer Rainfall Area

The area of summer rainfall may be divided as follows:—

Sub-Tropical Belt.—A sub-tropical region extending from the sea to roughly 1,500 feet above sea level.

Lower Midlands.—Hills and plains situated above 1,500 feet, including districts like Pietermaritzburg, Eshowe, Howick, and low lying river valleys in Natal, Zululand and Swaziland.

Midlands.—From 3,000 feet to 4,500 feet above sea level. Frequently misty, and experiencing occasional severe frosts.

Highveld.—From 4,500 feet upwards, including a large part of the Transvaal, the Orange Free State, and mountainous regions of Natal and Zululand. In every division, however, altitude is not so important as climate and temperature. These are the best guides.

Florida Roots	15/-	12/6
Waverley Grass	15/-	12/6

Renovation of Lawns

Lawns which have been badly laid down at first, or neglected afterwards, may be improved by sowing 20 to 30 lbs. of Lawn Seed per acre. Before sowing, the surface of the soil must be well stirred with a strong iron rake, and afterwards top-dressed with fine soil, if possible. If the land is poor, a top-dressing of Bone Meal is desirable. After top-dressing, roll the lawn, sow the seeds, rake them over with a fine rake, and afterwards roll well both ways.

PLEASE NOTE.—Special Prices for large quantities. Standard Mixture is suitable for Cane, Cotton, Vegetables, Flowers, Maize, Root Crops and Wheat.

Fertilizers are applied to the soil to increase its fertility and to put back the plant food taken from the soil by growing crops. Experiments only can decide what fertilizers should be applied, but the following are approximate quantities necessary:—

Fertilizers for Grain and Maize	200-400 lbs. per Acre
,, Lucerne and Tobacco	600-700
,, Potatoes and Roots	500-700
,, Vegetables	600-800

The smaller quantities could be applied on fertile soils, or on farms where extensive crops are grown, and the larger quantities on less fertile soils or in the case of intensive farming.

Sowing and Seeding Calendar

FOR FARM SEEDS

The data given below must necessarily be regarded as approximate, especially in reference to times of planting, the periods specified merely indicating the latitude that can be taken subject to weather conditions or facilities for irrigation. Figures indicate rate of seeding in pounds per acre, except where otherwise stated (two and one-ninth acres equal one morgen); b stands for broadcast, d for drills.

Artichokes (Jerusalem).—Same as potatoes (d).

Barley (Summer).—All Provinces, November to December (80—100).

Barley (Winter, Irrigated).—Transvaal, O.F.S. and Natal, May to June (70—80); Cape Midlands, February to May (60—70); Western Province, May (40—50 b).

Beans (Dwarf).—All Provinces, August to February, according to last and first appearance of frost (10—50, according to variety), drills two feet apart.

Beans (Runner).—All Provinces, October to November for seed; to December if for ploughing in (20—30, d).

Buckwheat.—Cape Midlands, November to February; Transvaal, November to January; Natal, September to February; Western Province, September to January (30—50, b).

Chicory (Summer).—All Provinces, November to December (4—5, d).

Chicory (Winter).—All Provinces, February to April (3—4, d).

Cotton.—All Provinces, October to November (5—7, d).

Cow-Peas.—All Provinces, October to December, for seed; to January for ploughing in (30—50, b or d).

Grasses.—Kikuyu: All Provinces, during moist warm weather, cuttings set 3 ft. x 3 ft. apart. Paspalums: All Provinces, November to February (15—20, b). Sudan: All Provinces, October to January (20, b). Teff: All Provinces, October to February (6—10, b). January to February will be found the best months for sowing most grasses.

Kaffir-Corn.—All Provinces, September to middle of December (5—8, d).

Linseed.—All Provinces, October to March (20—30, b).

Lucerne under Irrigation.—Cape Midlands, September to October and January to April; other Provinces, February to April (15, d; 25, b).

Maize.—Late Varieties (Natal White Horsetooth, Natal Yellow Horsetooth, Ladysmith White, Hickory King, Potchefstroom Pearl, German Yellow): September to middle of December.

SOWING AND SEEDING CALENDAR—(Continued)**MAIZE—(Continued)**

Medium Varieties (Iowa Silver Mine, Chester County, White Cango, Yellow Cango): September to end December.

Early Varieties (Bread Mealies, Boesman): November to middle of January (8—20, d), according to variety: for silage to end of January.

Mangels.—All Provinces, October to December (5—8, d).

Manna and Millet.—All Provinces, October to December (12—20, b).

Melons.—All Provinces, October to December (2—4).

Oats (Summer).—Cape Midlands, November to January; other Provinces, August to November (70—80, b).

Oats (Winter).—Western Province, April to June; other parts, February to March (50—100, b).

Oats (under Irrigation).—Cape Midlands, March to July; other Provinces, March to April.

Onions (Main Crop).—Transvaal, August to February; Western Province, March to June; Natal, April to May (4—6, d).

Peanuts (Monkeynuts).—All Provinces, October to middle of December (15, shelled; 40, unshelled, d).

Peas (Main Crop).—Cape Midlands, May to July; other Provinces, February to April (60—100, d).

Potatoes (Early).—Transvaal and O.F.S., August to September; Cape Midlands, August to January; Natal, June to August (6—10 bags, according to size, d).

Potatoes (Main Crop).—Transvaal and O.F.S., December to January; Cape Midlands, September to November; Natal, September to December (6—10 bags, according to size, d).

Pumpkins.—Cape Midlands, September to December; other Provinces, October to December (2—5).

Rape (Winter).—Transvaal, February to April; Cape Midlands, January to March; Natal, January to February; Western Province, March to May (2, d; 8, b).

Rye (Winter).—Cape Midlands, February to April; Western Province, May to June; Transvaal and other Provinces, February to April (50—60, b).

Sunflower.—Western Province, September to December; other Provinces, October to December (7—10, d).

Sweet Potatoes (Cuttings).—November to January (rows 3 feet apart, spaced 18 inches in rows).

Tobacco.—Western Province, June to July; other Provinces, July to August; in seed-beds (one-sixth ounce to 20 square yards seed-bed). Transplanting: Western Province, September to October; other Provinces, October to November (one yard apart each way).

Turnips (including Swedes).—All Provinces, November to February (2—3, d).

Wheat.—Western Province, April to May (30—35, b); Cape Midlands, April to July; Transvaal, March to July (50—75, b); Eastern Free State, April to June.

FLOWER SEEDS

WHEN TO ORDER

JULY and AUGUST	Order Annuals, for Summer Flowers
SEPTEMBER to NOVEMBER ...	Order all Perennials
DECEMBER and JANUARY ..	Order Annuals for Autumn Flowers
FEBRUARY and MARCH ...	Order Annuals, for Winter Flowers
APRIL	Order Annuals, for Spring Flowers

The Raising of Flowers from Seed in South Africa presents considerable difficulty to those who have not studied the problem, but is quite easy when once the few underlying principles have been grasped.

Keep Seeds Moist.—It is imperative to remember that Seeds must never be allowed to become dry, once they have been planted.

Shading is Necessary.—It is impossible in practice to keep seeds moist if they are exposed to our fierce sun. Shading is, therefore, necessary. In any case seeds germinate better in the shade.

Light is Essential.—Once the seedlings come through the ground, it is absolutely essential they should get as much light as possible, as otherwise they will become weak and stalky and will never make strong, sturdy plants. The direct rays of the sun only should, therefore be excluded.

Provided the foregoing 3 Essentials are carefully attended to, success is assured

**HOW CAN YOU EXPECT
BEAUTIFUL FLOWERS**

**If you do not give them a Square
Meal.**

"SEEDS THAT GROW"

SWEET PEAS

It will soon be time for sowing this glorious flower for winter use. It is not yet widely known that there are two distinct classes of sweet peas, one, the ordinary summer flowering variety, the other the early flowering or winter sweet pea. This latter variety should be sown in February or March, and will begin to bloom in May and June and continue to flower throughout the winter. It grows and flowers well in almost any district in South Africa.

CULTIVATION.

Dig trenches 2 feet deep by 3 feet wide and work in plenty of cow manure, adding a good dressing of bone meal. The top six inches of soil should be without any manure whatsoever. Sow the seed about one inch deep and six inches apart, and water thoroughly. When the plants are 12 to 15 inches high cut back to 9 inches in order to stimulate the laterals, and thin out to one foot apart. Train and tie up to wire netting, and keep all side shoots cut off. Apply liquid manure as soon as the blooms appear, and continue using weekly throughout the season. Sweet Peas, to be grown successfully must have an unlimited supply of water.

Summer Flowering

NEW NOVELTIES. Prices are Post Paid.

"FORD'S Seeds Grow"

SWEET PEAS—(Continued)

GIANT EARLY OR WINTER FLOWERING

WHITE & CREAM.

White Harmony.

The Standard black-seeded variety pure white with exquisite large splendidly formed blooms. Of unusually strong growth, and quite free-blooming.

Snowstorm.

Canary Bird.

Pure White Wax.

Deep Cream; white seeded.

DEEP PINK.

Charm.

Growing rich pink with salmon sheen.

Giant Rose.

Clear deep pink; very large.

Pink Profusion.

Rich rose-pink on white.

Zovlanek's Rose.

A fine deep pink.

SALMON.

Mrs. Kerr.

Beautiful salmon. A favourite with everyone. Well waved large blooms.

SALMON PINK.

Flamingo.

A glorious flower of large size and lovely form. The standard is bright rich salmon-pink suffused with light orange; wings are rich orange-pink blending into a general salmon-pink effect.

ORANGE.

Burpee Orange.

A clear pure orange self.

ORANGE SCARLET.

Glitters.

A magnificent flower with a remarkable glowing colour. The standard is fiery orange-scarlet.

Vulcan.

Scarlet-cerise shaded brilliant orange.

CRIMSON.

Early King.

Bright crimson. A colour that always attracts attention.

LAVENDER.

Harmony.

Princess.

Lavender King.

Beautiful clear Lavender.

Soft Lavender, suffused mauve.

Rich deep lavender.

CREAM PINK.

Yarrawa.

Sunburst Improved.

Rose-pink tones with creamy base.

Cream Pink suffused bright pink shaded amber at edges. Charming.

SALMON-CERISE.

Gleam.

Showy bright salmon-cerise with a suffusion of rich cherry-pink. A lovely new shade.

ROSE.

Chevalier

Pure rose with just a faint and elusive touch of lemon that is irresistibly lovely. In form, habit, and colour, we consider Chevalier the best Sweet Pea of true rose shade.

CERISE.

Gorgeous.

Soft cerise, shades salmon.

BLUE.

Blue Bird.

Rich pure Blue.

Nearest Station

Imported Seeds cannot be sent by Agricultural Post.

If insufficient cash sent quantities reduced accordingly.

NON-WARRANTY.—We take the utmost care to supply Seeds, etc., true to name and character, of good germinating strength, and genuine in every way, but, owing to changeable climatic influences, different modes of cultivation, and various causes over which we have no control, WE GIVE NO WARRANTY, expressed or implied, as to description, quality, growth, productiveness or any other matter of any of the seeds, trees, plants and bulbs we send out, and will not in any way be responsible for results. If the purchaser does not accept the goods on these terms they are at once to be returned.

Quotations subject to Market Fluctuations and goods being unsold on receipt of orders.

Carried forward ... £

NOTE.—Another Order Form will be found at the front of this book.
